16:20	Consumer perspectives	
16:30	Conclusions and results from interactive session	Dr Derek Sherwood
17:00	Close	

The following data analysis is based on feedback from 25% of attendees

1. Overall, how useful did you find the workshop?

2. Was the material presented in a balanced way?

3. Content

Was the content relevant to your area of practice?

Was the content current?

4. Do you feel the sessions were a good investment of your time?

5. List the most important things you have learned today.

CHRISP Pathway project

Aware now of how quality could support/mentor projects

Importance of shared decision-making 10

Importance of equity 10

Equity issues need to be more explicitly stated in recommendations

Red flags for major surgery

Evaluation and audits important x2

That improvement projects must ultimately be for people

That ACP discussion takes 10-14 mins yet yields huge results x2

Four questions

Learnt about the commonality of issues x2

To promote Choosing Wisely at all opportunities 2

Posters aren't always the answer

Time, or lack of it, is not an excuse

Case studies and implementation

Consumer perspectives

Involvement in education

Benefit of RN input at time of surgery recommendation

Reframing the discussion – don't do "don't" statements

Allergies to drugs can wane

General lack of awareness of CW

6. How will this workshop change your practice?

Reinforced importance of communication and discussing all options x2

Need to further investigate CW within my region

Will take the allergy delabelling project to our antibiotic stewardship group for consideration.

In discussions with patients, always ensuring the 4 questions are asked and answered, specifically about the value of pharmacotherapy.

Initiate a planning group with our Radiology where we can investigate how we can influence CW with the organisation.

*Helped me with targeting more focused ACP/SICG rollout in Canterbury= surgical
 Encourage nursing/drs and patients to bring patients' needs/requests to the table – first and foremost.
 Will help re-focus RACP Evolve program on communication, equity and evaluation.
 Raise awareness of communication disability and impact on SDM
 Increased involvement in Choosing Wisely education
 Consideration of development of guidelines and collaboration
 Will review projects/innovations with a CW mindset
 I enjoyed the session by Ross Bosswell on lab test
 Reinforce usefulness of pre-op testing and what will be done with the results*

7. What could we improve for next time?

*Venue - Poor visibility with columns in room
 Crowded room and lunch area x 7
 Cold room x3
 Kai was great (“lovely” “excellent” “delectable”) x 5
 Excellent venue and staff x 4
 Good central venue x2*

*Groups sessions - Less structured talks
 Clearer thought/planning about where each group should be seated
 Needed longer in group sessions and more interactive sessions x7*

No need to give speakers' full background each time as this was all provided in the programme.

8. Other comments

*Good info on emails prior to event
 Liked Consumer magazine but did we need all the papers! x2
 Enjoyed short, concise presentations
 Great quality speakers
 Some speakers spoke too softly and could not be heard.
 Some presenters delivered every word on their slides – less impactful.
 How does CW fit into the private system in a structural way?
 Would be interesting to see if clinicians across both do have different behaviour, based on payment model.
 Med students presentations/research was great
 Need to focus CW's application to NZ practice – CW has been taken over by other interest groups
 Loved Dr Tipene-Leach's talk
 Would enjoy a nursing perspective
 Perhaps consider Auckland as venue next time
 Overall a great day, really interested to hear more on the CRISP role
 Great forum that anyone and everyone should attend
 Good to have consumer presence
 Where is primary care work?
 Excellent experience
 As facilitator of workshop session didn't get the planned opportunity to pitch our session to group
 Keep up the good work!*

Further involvement and engagement

- 18 participants have signed up for the Choosing Wisely newsletter
- 13 participants would like to be involved in the Choosing Wisely interest groups
 - 2 x Pharmacy
 - 5 x DHB
 - 4 x GP/PHO
 - 4 x Nursing
 - 3 x Allied Health
